Introducing Spare Mic: The Revolutionary iOS App that turns your iPhone into a wireless microphone for High-Quality Video Recording

Beaverton, OR - Jan 26, 2023 – Say goodbye to poor sound quality and hello to crystal clear audio with Spare Mic, the innovative new iOS app that turns your iPhone into a wireless microphone for recording videos.

With spare Mic, you can easily capture high-quality audio while recording videos on your iPhone or iPad. Whether you're recording a TikTok video, Instagram Reel or YouTube Short, Spare Mic ensures that your audio will be crisp and clear.

The app allows you to use a second iOS device as a wireless microphone. It is incredibly easy to use and connects your devices via WiFi, so you can be up to 30 feet/10 meters when recording video and capture audio as though you were inches from your phone.

"We're thrilled to introduce Spare Mic to the world," said Tewodros, the app's creator. "We've always been passionate about audio and video recording, and we know that sound quality is just as important as video quality. With spare Mic, we're giving users the affordable tools they need to capture high-quality audio with ease."

Spare Mic is available for download now on the App Store to try for Free and a lifetime watermark free video export in-app purchase for \$4.99. Try it out for yourself and see the difference in sound quality.
